1. *polynucleotides - face* salmostim

	PLURYAL SILK	PLURYAL DENSIFY
Composition	Polynucleotides 15mg (7.5mg/ml)	Polynucleotides 20mg (10mg/ml) Hyaluronic acid 20mg (10mg/ml) Mannitol 80mg (40mg/ml)
Indications	Priming treatment. Repairing treatment of the thin areas. Stretch marks. Scars.	Priming treatment. Repair of damaged, dull and tired skin. Scars. Facial erythema*.
Areas	Peri-orbital area (eyelids, dark circles, crow's feet). Peri-buccal area. Neck/ Décolletage. Body stretch marks and flaccidity.	Face (except under eyes). Neck / Décolletage. Priming treatment.
Effect	Improves the skin turgidity, suppleness and tonicity. Attenuates stretch marks and scars.	Nourishes, plumps, rejuvenates & bio-revitalizes. Repairs the skin (face, neck and body). Prolongs the effects of adjuvant aesthetic treatments.
Level of injection	Deep dermis/ Mid dermis (around lips and eyes)	Deep dermis
How supplied	1 x 2ml syringe	1 x 2ml syringe
Needles	2 x 30 G ½ needles	2 x 30 G ½ needles
CE Marking	CE 0373 (syringe - MD Skin Solutions) CE 0318 (needle - Becton Dickinson)	CE 0373 (syringe - MD Skin Solutions) CE 0318 (needle - Becton Dickinson)

*Not included in the IFU but proven clinical studies

Name:

silk

Composition

Pluryal® Silk is a sterile, non-pyrogenic, viscoelastic intradermal gel composed of polynucleotides of natural origin (extracted from salmon) at a concentration of 7.5 mg/ml, formulated in an isotonic aqueous solution with sodium chloride and phosphate buffer salts.

Purpose

Pluryal® Silk is intended for intradermal injection to improve skin hydration, suppleness, firmness, and tonicity. Its non-volumizing composition and homogeneous tissue integration make it particularly suitable for delicate areas, including the peri-orbital regions, helping to limit undesired effects such as discoloration or puffiness associated with less adapted injectable products.

*Efficacy of Polynucleotide Injections for the Treatment of Undereye Wrinkles: A Prospective study., Ziade G, Keyrouz E, Karam D, Sweidan D, Daou D, Fidawi G, 2024

Name:

densify

Composition

Pluryal® Density is a sterile, non-pyrogenic, viscoelastic intradermal gel combining polynucleotides (10 mg/ml), hyaluronic acid (10 mg/ml), and mannitol (40 mg/ml), formulated in an isotonic aqueous solution. The synergistic combination of polynucleotides and hyaluronic acid supports skin hydration and trophism, while mannitol contributes to protection against oxidative stress.

Purpose

Pluryal® Density is intended for intradermal injection to improve skin density, firmness, elasticity, and overall skin quality. Ex-vivo studies* have shown stimulation of key structural markers, including collagen I, collagen III, elastin, and hyaluronic acid synthase-1 (HAS-1), supporting dermal revitalization and tissue remodeling.

1. *polynucleotides - hair* salmostim

	Hair Density
Composition	Polynucleotides 15mg (7.5mg/ml)
Indications	Androgenic alopecia in women and in men*. Telogen effluvium. Adjuvant therapy after hair transplant, LED light and PRP**.
Areas	Scalp. Eyebrows. Beard.
Effect	Improves the hair thickness. Slows down the hair loss.
Level of injection	Deep dermis
How supplied	1 x 2ml syringe
Needles	2 x 30 G ½ needles
CE Marking	CE 0373 (syringe - MD Skin Solutions) CE 0318 (needle - Becton Dickinson)

* *Clinical study on 20 patients published in the "Archives of dermatological Research" and conducted by Ayatollahi A., Firooz A., Samadi A., Kashani MN., Zamani S., Efficacy and tolerability assessment of a polynucleotide-based gel for improvement of pattern hair loss.

Composition

Pluryal® Hair Density is a sterile, non-pyrogenic, viscoelastic intradermal gel composed of polynucleotides of natural origin (extracted from salmon) at a concentration of 7.5 mg/ml, formulated in an isotonic aqueous solution with sodium chloride and phosphate buffer salts.

Purpose

Pluryal® Hair Density is intended for intradermal injection into the scalp to improve hair and scalp quality. In a clinical study* conducted in patients with androgenetic alopecia, the product was shown to be safe and well tolerated and demonstrated effectiveness in reducing hair shedding and increasing hair thickness, supporting hair density and slowing hair loss.

Name:

biosculpture

Active Matrix - High
Molecular Weight HA

Composition

Pluryal® Biosculpture is based on Matricyal® 3D Technology, combining 25 mg/ml of non-animal cross-linked hyaluronic acid with a high proportion of free low molecular weight hyaluronic acid embedded within a 3D matrix.

This unique architecture allows an immediate volumizing effect while gradually releasing bioactive HA to stimulate fibroblasts, collagen synthesis, and skin regeneration. Its very low residual BDDE level (<0.1 ppm) ensures an excellent safety profile.

Purpose

Pluryal® Biosculpture is designed to correct early volume loss and skin laxity while improving overall skin quality. Ex-vivo studies* have demonstrated increased hyaluronic acid and fibronectin expression in the dermis, supporting its role in long-term skin restructuring and rejuvenation.

*Combined with Pluryal Silk

* Evaluation on human skin maintained in survival of the biostimulation of connective tissue macromolecules after injection of 3 biofillers, Gredeco, 2025

Name:

bioclassic

Composition

Pluryal® Bioclassic contains 25 mg/ml of non-animal cross-linked hyaluronic acid formulated with Matricyal® 3D Technology, combining high and medium molecular weight HA with embedded free medium molecular weight HA. This balanced composition provides structural support while enabling a controlled release of bioactive HA, promoting collagen stimulation and tissue regeneration alongside a filling effect.

Purpose

Pluryal® Bioclassic is intended for the correction of moderate wrinkles, folds, and skin laxity, while simultaneously enhancing skin density and quality. It delivers natural volume correction with a gradual biostimulatory effect, helping restore firmness and elasticity over time. Ex-vivo data* confirm its capacity to stimulate dermal components involved in skin restructuring, making it an effective hybrid solution for both correction and regeneration.

* Evaluation on human skin maintained in survival of the biostimulation of connective tissue macromolecules after injection of 3 biofillers, Gredeco, 2025

Name:

Biovolume

Composition

Pluryal® Biovolume is formulated with 25 mg/ml of non-animal cross-linked hyaluronic acid using Matricyal® 3D Technology, characterized by a higher proportion of high molecular weight cross-linked HA and embedded free medium molecular weight HA. This structure ensures strong volumizing capacity combined with sustained biostimulatory activity, while maintaining excellent spreadability and safety.

Purpose

Pluryal® Biovolume is designed to restore and redefine deeper facial volumes while supporting long-term improvement of skin structure. It provides immediate lifting and contouring effects, complemented by progressive stimulation of collagen and extracellular matrix components. Ex-vivo studies* have demonstrated increased dermal hyaluronic acid and fibronectin expression, confirming its dual action as both a volumizing filler and a biostimulator.

3. skinbooster

	PLURYAL BOOSTER
Composition	HA: 18mg/ml Glycerol: 20mg/ml
Technology	PREMIUM
HA Molecular Weight (Da)	3 Million
Indications	Skin elasticity and hydration.
Packaging	1 x 1ml
CE Marking	CE0123

skinbooster

Name:

booster

Composition

Pluryal® Booster is composed of hyaluronic acid (18 mg) combined with glycerol (20 mg). Glycerol is added to help stabilize the hyaluronic acid matrix and reduce its rapid degradation, while also contributing antioxidant and moisturizing properties that support skin hydration and quality.

Purpose

Pluryal® Booster is a viscoelastic solution intended to replenish hyaluronic acid loss associated with aging, help maintain skin hydration, and improve skin elasticity. In a single-center, open-label, before-and-after clinical study* conducted on 20 volunteers in Iran, Pluryal Booster was shown to be safe and well tolerated, with observed improvements in skin elasticity and a relative increase in skin hydration.

dermal fillers

* Pluryal Classic and Volume are available also with Lidocaine

Name:

classic

with or without Lidocaine

Composition

Sterile, biodegradable, viscoelastic, and homogenized injectable implant composed of medium cross-linked hyaluronic acid at a concentration of 23 mg/ml in a physiological buffer. BDDE is used as the cross-linking agent, enhancing hyaluronic acid stability and supporting long-lasting performance, with a well-established safety profile from decades of use in dermal fillers.

Purpose

Pluryal® Classic is intended for the correction of moderate to severe wrinkles, including nasolabial folds, and for lip reshaping and volume enhancement. Available with or without lidocaine, it features optimized rheology, an appropriate G' , and balanced softness, making it a versatile solution for both wrinkle correction and lip treatments.

Name:

volume

with or without Lidocaine

Composition

Sterile, biodegradable, viscoelastic, and homogenized injectable implant composed of highly cross-linked hyaluronic acid at a concentration of 23 mg/ml in a physiological buffer. BDDE is used as the cross-linking agent, enhancing hyaluronic acid stability and supporting long-lasting performance, with a well-established safety profile from decades of use in dermal fillers

Purpose

Pluryal® Volume is intended for the correction of moderate to severe wrinkles, in particular moderate to severe nasolabial folds. Available with or without lidocaine, it features optimized rheology, an appropriate G' , and high cohesivity, providing effective volume restoration and structural support with natural-looking results.

Name:

*contour
lidocaine*

Composition

Pluryal® Contour Lidocaine is a sterile, biodegradable, viscoelastic injectable gel composed of cross-linked sodium hyaluronate at a concentration of 25 mg/ml, formulated in a physiological phosphate buffer and supplemented with 0.3% lidocaine hydrochloride to reduce injection-related discomfort.

Purpose

Pluryal® Contour Lidocaine is intended to restore facial volume in order to correct moderate to severe midface volume deficits and treat signs of aging. Its very high G' and optimized rheological properties provide strong lifting capacity and structural support, allowing effective volume restoration with a limited amount of product.

5. *skin health* mesoline

	Composition	Main indications	Focus areas	How supplied
Exoyouth	Plant-derived exosomes / Hyaluronic acid / Panthenol / Centaurea cyanus callus lysate extract / Rosa centifolia leaf extract.	Priming treatment. Acne scars. Aging skin.	Face. Neck & décolletage. Dorsum of the hands.	5 x 5ml vials
Refresh	Hyaluronic acid / Vegetal stem cells booster / Salmon DNA / Vitamins (B5, B3, B6, A).	Loss of glow and elasticity. Priming care before EBD, filler or botulinum toxin.	Face. Neck & décolletage. Dorsum of the hands.	5 x 5ml vials
Radiance	Tranexamic acid / Glutathione / Carnosine.	Melasma. Post-inflammatory. Hyperpigmentation (face and body). Dark circles. Body hyperpigmentation in hairy areas.	Face. Décolletage. Dark circles. Body.	5 x 5ml vials
Shine	Ethyl ascorbic acid / Phytic acid / Pyruvic acid / Kojic acid / Mulberry leaves extracts.	Photoaging (sun damage). Non-homogeneous complexion.	Face. Dorsum of the hands.	5 x 5ml vials
Antiox	4 antioxidants: Glutathione, Mannitol, Alpha Lipoic Acid, N-acetyl-cysteine. 4 amino acids: Taurine, Proline, Cysteine, Cystine. 1 mineral: Zinc gluconate.	Dull skin. Menopause skin. Aggressed skin. Telogen effluvium. Priming treatment.	Face. Scalp.	5 x 5ml vials
Tight	DMAE / Silicium / Panthenol / Ferulic acid / Minerals.	Flaccid skin. Acne scars and dilated pores. Stretch marks. Post-pregnancy.	Face. Neck. Body.	5 x 5ml vials
Clear	Retinyl palmitate / Ginkgo biloba / Salicylic acid / Hyaluronic acid 10mg / Vitamins (E, B5, B3 and B6).	Acne prone skin. Acne lesions and dilated pores.	Face. Back.	5 x 5ml vials

Name:

exoyouth

Composition

Pluryal® Mesoline Exoyouth is a sterile cosmetic serum combining plant-derived exosomes, hyaluronic acid, panthenol, Centaurea cyanus callus lysate extract, and Rosa centifolia leaf extract. It contains 85 million exosomes per vial. The presence of plant-derived exosomes delivers advanced cell-signaling support, making Exoyouth a powerful priming and regenerative solution.

Purpose

It is intended to promote skin renewal and regeneration, improve skin quality, and support tissue repair. Exoyouth is particularly suitable for aging skin, acne scars, and as a priming treatment to enhance overall skin responsiveness.

Name:

refresh

Composition

Pluryal® Mesoline Refresh is a sterile cosmetic serum combining hyaluronic acid, vegetal stem cell booster, salmon DNA (polynucleotides), and a vitamin complex (A, B5, B3, B6) to support skin hydration and regeneration. This combination provides global skin revitalization while preparing the skin to respond optimally to subsequent treatments.

Purpose

It is intended to improve skin hydration, elasticity, and radiance, and to address early signs of aging. Refresh is also suitable as a priming treatment before aesthetic procedures such as fillers, energy-based devices, or botulinum toxin.

Name:

radiance

Composition

Pluryal® Mesoline Radiance is a sterile cosmetic serum composed of tranexamic acid, glutathione, and carnosine, combining depigmenting, antioxidant, and anti-glycation activities. Its tranexamic-acid-based formulation targets pigmentation pathways at multiple levels, offering a comprehensive approach to persistent and hormonally driven hyperpigmentation.

Purpose

It is intended to improve uneven skin tone and reduce hyperpigmentation, including melasma, post-inflammatory hyperpigmentation, dark circles, and body pigmentation, contributing to a more homogeneous and luminous complexion.

Name:

shine

Composition

Pluryal® Mesoline Shine is a sterile cosmetic serum combining ethyl ascorbic acid, phytic acid, pyruvic acid, kojic acid, and mulberry leaf extracts, all known for their brightening and tyrosinase-inhibiting properties. The synergistic association of brightening acids and botanical tyrosinase inhibitors delivers a fast visible glow and makes Shine the ideal solution for dull, sun-damaged skin.

Purpose

It is intended to improve skin radiance and treat photoaging and non-homogeneous complexion by targeting pigment irregularities, helping restore brightness and glow to the skin.

Name:

antiox

Composition

Pluryal® Mesoline Antiox is a sterile cosmetic serum combining a powerful antioxidant complex (glutathione, mannitol, alpha-lipoic acid, N-acetyl-cysteine), amino acids (taurine, proline, cysteine, cystine), and zinc gluconate. Its unique combination of four antioxidants, amino acids, and zinc provides one of the strongest injectable antioxidant shields, making it ideal as both a corrective and preventive care.

Purpose

It is intended to protect the skin and scalp against oxidative stress, improve dull and fatigued skin, support skin recovery after aggressions, and help optimize and prolong the effects of aesthetic treatments.

Tight

Composition

Pluryal® Mesoline Tight is a sterile cosmetic serum containing DMAE, silicium, panthenol, ferulic acid, and essential minerals, combining firming, collagen-supporting, and antioxidant actives. Thanks to collagen-stimulating actives such as DMAE and silicium, Tight delivers a visible tightening and densifying effect.

Purpose

It is intended to improve skin firmness, density, and elasticity, and to address flaccidity, dilated pores, acne scars, and stretch marks on the face and body.

BEAUTY POWERED BY INNOVATION

5. *skin shape* mesoline

	Composition	Main indications	Focus areas	How supplied
Face Contour	Deoxycholic acid 1% Flavonoids	Submental fat	Double chin	5 x 5ml vials
Body Contour	Deoxycholic acid 1.24% Phosphatidylcholine 2.5%	Body fat deposits	Body	10 x 5ml vials
Body Firm	L-carnitine / Caffeine, Silicium / Artichoke / Ruscus aculeatus / Centella asiatica.	Drainage. Cellulite. Post-emptiers.	Double chin. Body areas.	10 x 5ml vials

Name:

*face
contour*

Composition

Pluryal® Mesoline Facecontour is a sterile cosmetic serum formulated with deoxycholic acid and a complex of flavonoids including aesculus hippocastanum, equisetum arvense, and ginkgo biloba, combining contour-supporting and skin-protective actives. The association of deoxycholic acid with anti-inflammatory, regenerating, and antioxidant flavonoids helps support contour refinement while respecting the delicate submental area.

Purpose

Pluryal® Mesoline Facecontour is intended to improve the appearance of localized adiposity in the submental area and support facial contour definition. It contributes to a more refined jawline appearance when used as part of a professional aesthetic protocol.

Name:

*body
contour*

Composition

Pluryal® Mesoline Bodycontour is a sterile cosmetic serum combining phosphatidylcholine and deoxycholic acid in a 2:1 ratio, specifically designed to act synergistically on localized fat deposits. The phosphatidylcholine–deoxycholic acid association enhances lipid emulsification and supports drainage, offering a balanced approach to body contour refinement.

Purpose

Pluryal® Mesoline Bodycontour is intended to improve the appearance of localized body fat and help refine body contours in areas such as the abdomen, thighs, hips, buttocks, and knees, as part of a non-surgical aesthetic program.

	Composition	Main indications	Focus areas	How supplied
Hair	Copper peptide / Stem cells booster / Vitamin B complex / Hyaluronic acid / Amino acids / Caffeine.	Androgenic alopecia. Telogen effluvium. Post-hair transplantation.	Scalp	5 x 5ml vials

Name:

hair

Composition

Pluryal® Mesoline Hair is a sterile cosmetic serum formulated with a short, highly concentrated combination of hair-supporting actives, including panthenol, a vegetal stem cell booster, vitamins, amino acids, hyaluronic acid, caffeine, and a copper peptide. This focused, high-concentration formula delivers a triple cosmetic action by combining scalp hydration, follicular environment support, and regulation of factors associated with hair thinning.

Purpose

Pluryal® Mesoline Hair is intended to support scalp vitality and improve the appearance of hair density, thickness, and quality in men and women. It helps reduce the visible signs of hair thinning and supports stronger, healthier-looking hair as part of a professional cosmetic hair revitalization protocol.

6. *needle-free mesotherapy* mesoline system

Category	Description
Device	Needle-free mesotherapy device: fast, painless, safe.
Key features	3-in-1 system: Vacuum Drainage, Microdermabrasion, Mesoporation. Compact and Ergonomic.
Treatment steps	1. Vacuum: boosts circulation. 2. Microdermabrasion: exfoliates & evens tone. 3. Mesoporation: delivers actives.
Benefits & Results	Face: firms, brightens, regenerates and hydrates the skin. Body: tones and lifts the skin, reduces cellulite.
How mesoporation works	Short high-voltage pulses open skin channels for deep ingredient delivery: reversible & safe.
System association	To be used with Mesoline sterile serums to achieve desired results.
Included components	• Mesoporation handpiece with spheres • Vacuum and microdermabrasion handpiece • 9 diamond tips of varying strengths and sizes • Steel plate
Technical specifications	5 kg, 230 V, vacuum 0 – -800 mbar, 4.3" touch screen, multilingual: English, French, German, Spanish, Italian, Portuguese, Czech, Finnish, Polish

Name:

*mesoline
system*

Composition

Stimulates microcirculation with vacuum drainage to detoxify and reduce puffiness, exfoliates with microdermabrasion to renew skin and refine texture, and uses mesoporation to enhance active ingredient absorption, boosting collagen, hydration, and regeneration.

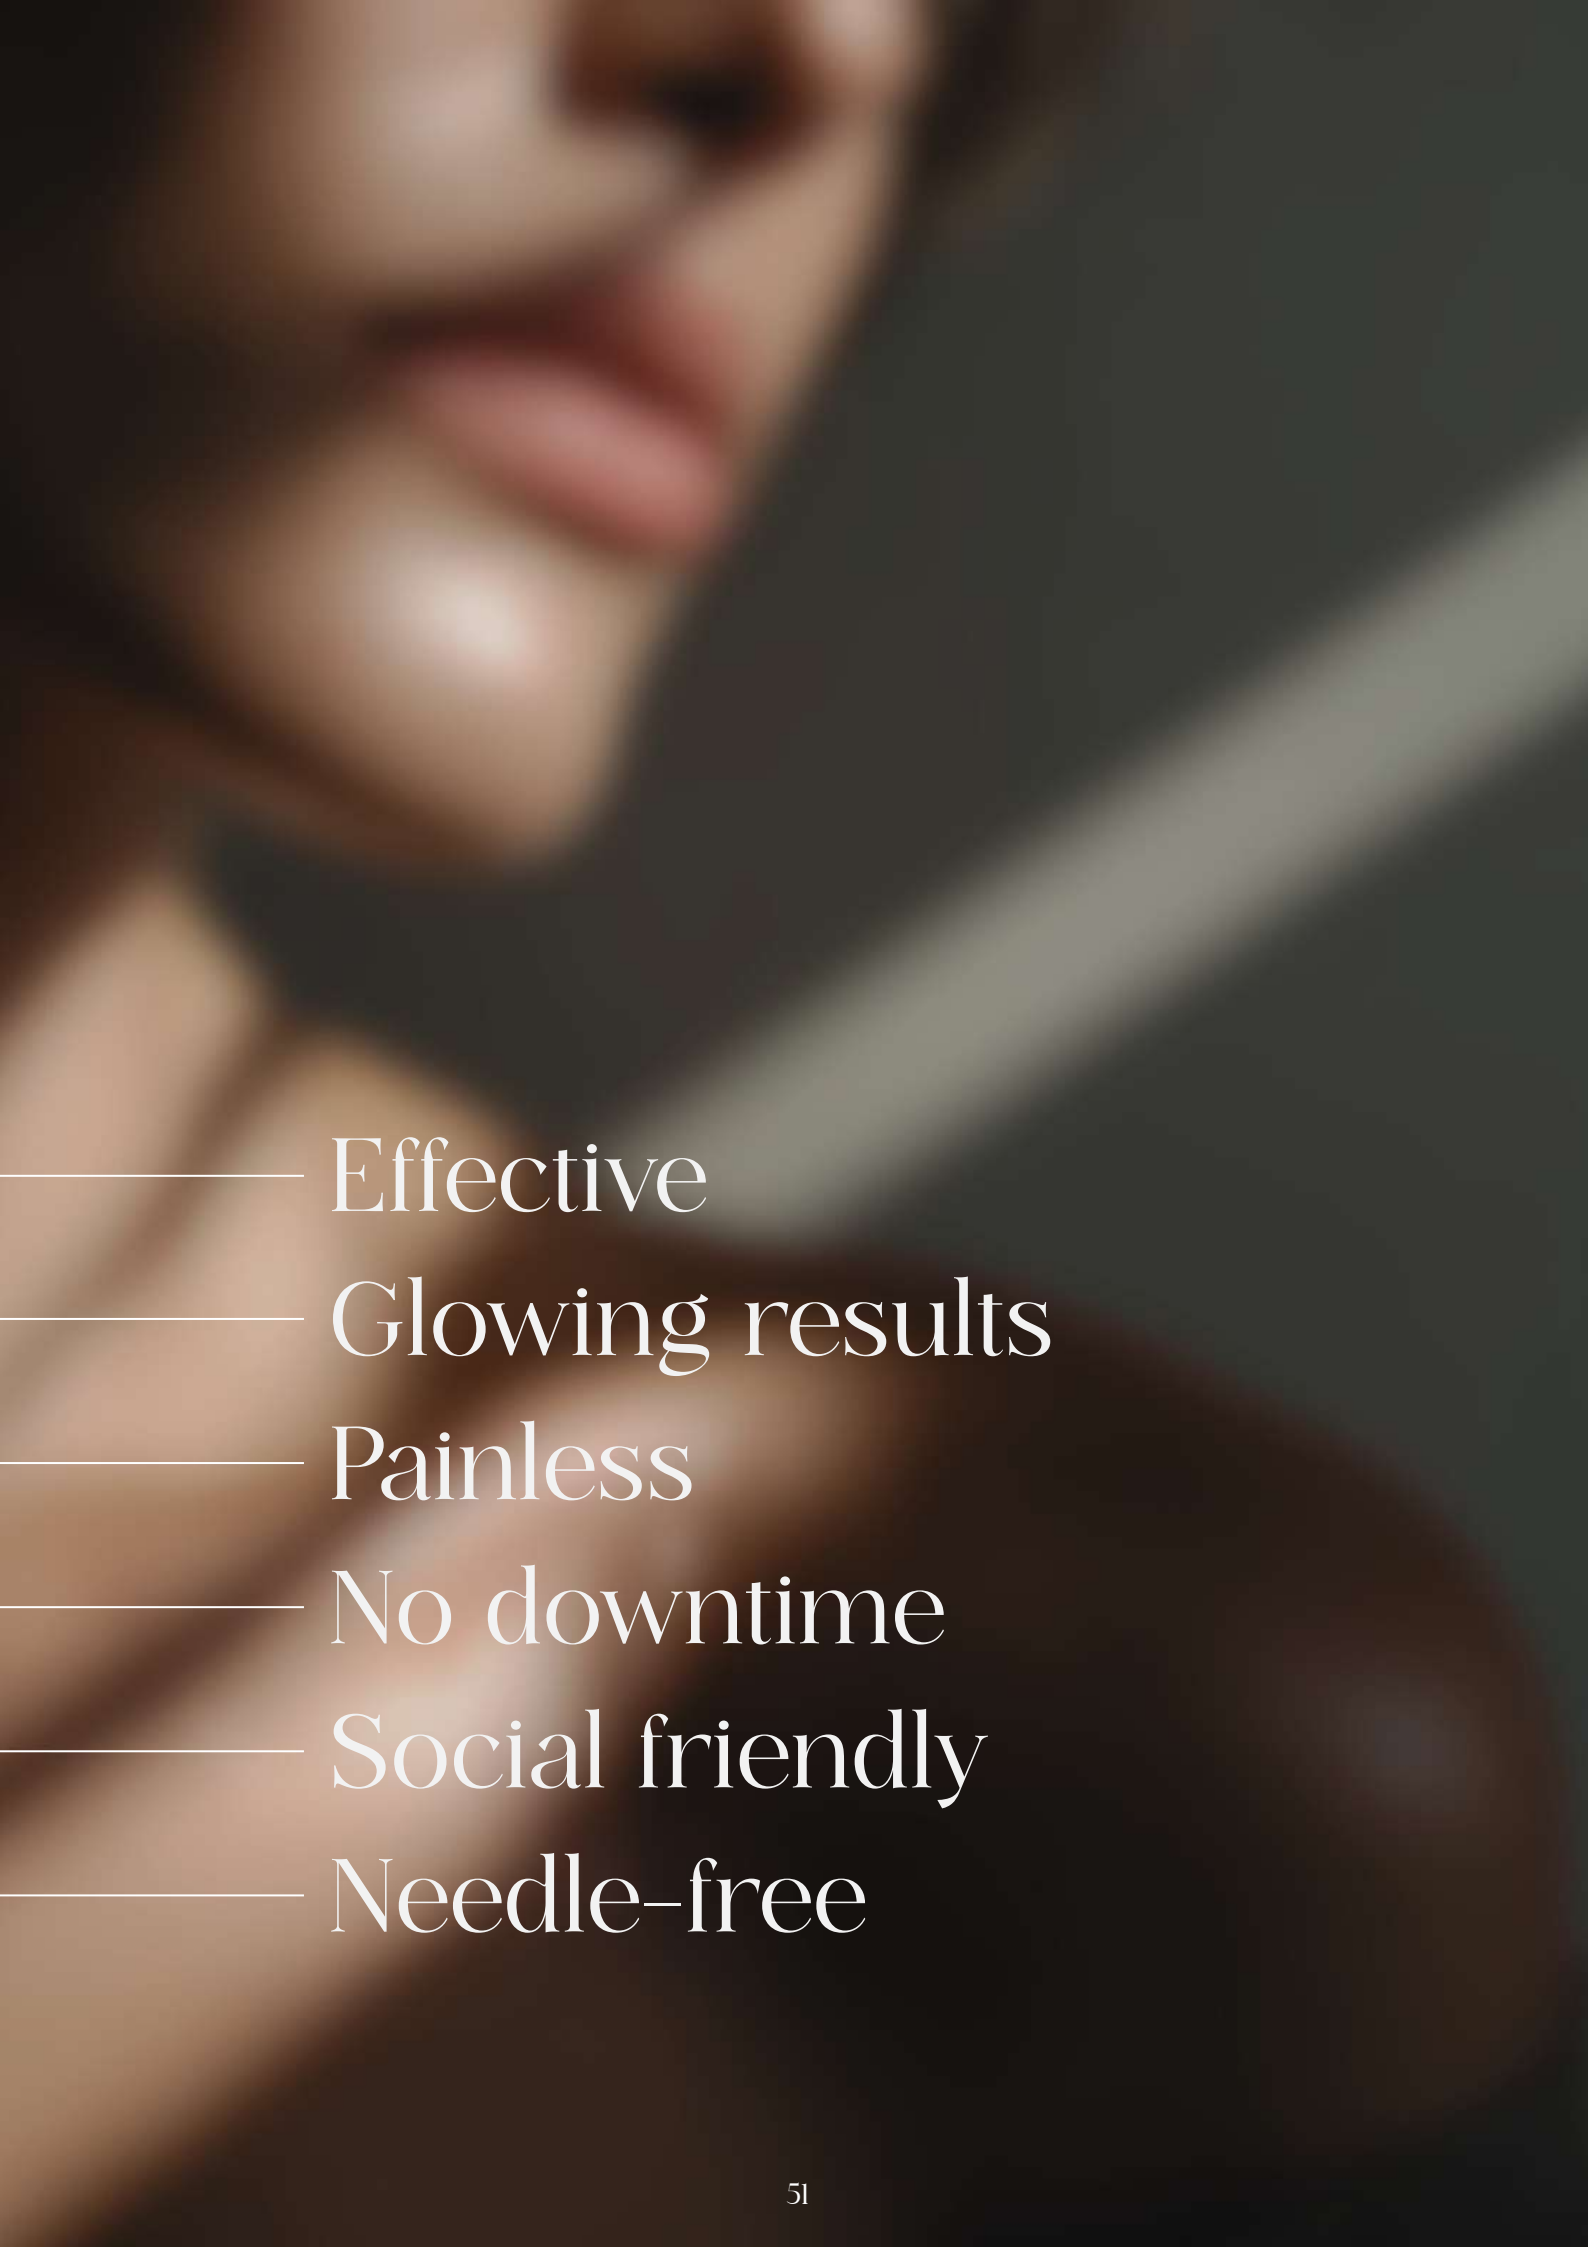

Purpose

Mesoline system is needle-free mesotherapy device, designed to revitalize skin by enhancing circulation, exfoliating impurities, and delivering active ingredients deep by increasing the skin's permeability. It targets puffiness, pigmentation, wrinkles, and cellulite, improving texture, tone, and hydration for a refreshed look on both face and body.

7. *from clinic to at home microneedling* meso'me

	Benefits	Ingredients	Results
Tight	Reduces roughness. Anti-wrinkles effect. Improves skin's firmness.	Panthenol / DMAE / Ferulic acid / Minerals.	85% firmer skin. 85% fine lines reduction. 85% more refined skin texture. 80% more rejuvenated skin. 75% wrinkles reduction.
Clear	Improves skin imperfections. Reduces dilated pores, blackheads and pimples. Regulates sebum.	Sodium hyaluronate / Salicylic acid / Ginkgo biloba leaf extract / Retinyl Palmitate / Vitamins.	90% tighter pores. 75% more purified skin. 75% blackhead reduction. 75% more even complexion. 70% pimple reduction.
Radiance	Improves skin's homogeneity. Brightens the skin. Decreases pigmentation.	Tranexamic acid / Glutathione / Carnosine.	80% less dull complexion. 80% more homogeneous complexion. 75% brighter skin. 70% dark spots diminished.
Hair	Strengthens the hair. Decreases hair loss.	Sodium hyaluronate / Caffeine / Pisum sativum extract (plant stem cells) / B5 vitamin / Amino acid.	85% overall better hair. 85% shinier hair. 80% stronger hair. 80% decreased hair loss. 75% thicker hair. 75% increased hair growth.
Optimizer	Increases skin hydration. Improves the skin aspect. Reduces redness.	Hyaluronic acid / DMAE / Glycerin.	100% smoother skin. 95% more hydrated skin. 95% redness reduction. 95% softer skin. 90% brighter skin.

Name:

Tight

Composition

meso'me Tight combines panthenol (pro-vitamin B5) , ferulic acid and DMAE in a serum formulated for use with an integrated microneedling roller to support skin regeneration and firmness. The association of actives targets both skin repair and firmness, while microneedling enhances active absorption and visible results.

Purpose

meso'me Tight is intended to improve skin firmness, smooth fine lines, and refine skin texture. It helps reduce the visible signs of aging and promotes a more toned, youthful-looking complexion with regular use. In a clinical study*, up to 85% of users reported firmer skin and a visible reduction of fine lines after one month of use.

*Clinical evaluation of the anti-aging efficacy of a cosmetic product, meso'me Tight, Ms Agnieszka Haponiuk, Eurofins Dermascan Poland, 2022

Name:

clear

Composition

meso'me Clear combines salicylic acid, ginkgo biloba, retinyl palmitate and hyaluronic acid in a purifying serum designed to support clearer, more balanced skin. The keratolytic and antimicrobial action of salicylic acid, retinyl palmitate and ginkgo biloba is complemented by hyaluronic acid's hydrating properties, while microneedling improves penetration and efficacy.

Purpose

meso'me Clear is intended for blemish-prone skin to help purify pores, regulate excess sebum, and improve overall skin texture. It supports a clearer, more even-looking complexion. In a clinical study*, 75% of users reported purer skin and fewer blackheads, with a visible reduction in imperfections.

*Clinical evaluation of anti-imperfection efficacy of meso'me Clear associated with a roller on 20 healthy volunteers conducted by Dr Sylvie Boisnic, Gredeco, 2022

Name:

radiance

Composition

meso'me Radiance is formulated with tranexamic acid and glutathione, combining depigmenting and antioxidant actives designed to support skin brightness and tone uniformity. This dual-action formula targets pigmentation pathways while protecting the skin from oxidative stress, enhanced by microneedling delivery.

Purpose

meso'me Radiance is intended to improve skin luminosity and even out complexion. It helps reduce the appearance of dark spots and dullness, revealing a more radiant and homogeneous skin tone. In a clinical study*, 80% of users reported a less dull and more even complexion, with up to 75% noticing increased skin radiance.

*Clinical evaluation of the efficacy of meso'me Radiance on 20 healthy volunteers conducted by Dr Sylvie Boisnic, Gredeco, 2022

Name:

hair

Composition

meso'me Hair is formulated with caffeine, amino acids, plant stem cells booster and vitamins, combined in a serum adapted for scalp use with an integrated microneedling roller. The combination supports scalp stimulation and renewal, while microneedling enhances delivery to improve visible hair quality.

Purpose

meso'me Hair is intended to support scalp vitality and improve the appearance of hair strength, thickness, and density. It helps reduce the visible signs of hair thinning and promotes healthier-looking hair. In a clinical study*, 80% of users reported stronger hair and reduced hair fall, with 75% observing thicker-looking hair.

Name:

optimizer

Composition

meso'me Optimizer combines hyaluronic acid, DMAE and glycerin to deliver intense hydration and support the skin barrier. Its highly moisturizing formula is specifically designed to soothe the skin after microneedling and enhance the comfort and results of all meso'me treatments.

Purpose

meso'me Optimizer is intended to hydrate, soothe, and protect the skin. It helps restore comfort, reduce redness, and boost skin softness and radiance, either alone or as a complementary step after roller use. In a clinical study*, 95% of users reported improved hydration and reduced redness, with immediate soothing effects after use.
